- **QUESTIONNAIRE** on the research/innovation programme of European Union Member States
- First stage (2004): Member States on the 1<sup>st</sup> January 2004
- Objective: Identification of complementarities and barriers for collaboration
  
- Member State

<b>Member State</b>
Sweden

- Generalities about the General Framework Programme / Agency responsible for initiating, steering and financing Multiproject programmes<sup>1</sup>:

<b>Complete name</b>
Energiforskningsprogrammet (Energy research programme)
<b>Short name</b>
<b>Web page address – in national language</b>
<a href="http://www.stem.se">www.stem.se</a>
<b>Web page address – in English</b>
<a href="http://www.stem.se">www.stem.se</a>
<b>Duration of the Programme</b>
2005-2011
<b>Global objective of the programme</b>
<b>Structure / Organisation / Core activities (priority areas etc.)</b>
The programme is managed by the National Energy Authority of Sweden (Energimyndigheten). The division into sub-programmes and focal areas is still to be finalised.

<sup>1</sup> In case there is not a General Framework Programme but an Agency responsible for initiating, steering and financing Multiproject programmes

▪ **Sections / Programmes related to Distributed Generation, DER and Renewable Energy**

Name of the area
Tbd
Web page address – in national language
Web page address – in English
Objectives of the section
As the framework programme starts in 2005 the detailed content is still open. However, bioenergy will form a key area in the new programme.
Research Priorities
Supply chain of biofuels Socio-economic issues (incl. market driven technology development)
Budget
tbd

▪ **Administrative and financial issues**

Institution responsible for the Programme
Energimyndigheten (National Energy Authority of Sweden)

Web page address – in English
Cost models and type of participants
Basic research at universities additional costs) and research institutes (full costs) is funded to 100 % through focal programmes.  Industrial development projects in the industry is co-funded.
Call
The first calls will be published in 2005, as well topical as continuous calls.

- **Type of financed projects / Programme implementation instruments**

<p>Research at universities and research institutes is funded directly by the authority through focal programmes. Industrial development projects are also co-funded.</p> <p>Some of the funds are allocated through the joint research bodies of the energy companies (Elforsk, Värmeforsk).</p>
---

- **Cooperation with other Member States and Regions and third countries**

<p>Most notably within the Nordic Energy Research Programme, where joint funds (Finland, Sweden, Norway, Denmark, Iceland) are pooled for project financing (esp. post-graduate research).</p>
